

January 26, 2008 - Antrim Township Board of Supervisors

MINUTES OF THE ANTRIM TOWNSHIP BOARD OF SUPERVISORS

WORK-SESSION (ROAD INSPECTION)

Saturday, January 26, 2008

The Antrim Township Board of Supervisors road inspection began at 7:45 A.M. Present were Supervisors Vice-Chairman Fred Young, III; James Byers, Sam Miller, and Rick Baer; Chairman Curtis Myers was unable to attend; Roadmaster Paul Barnett and Manager Ben Thomas, Jr.

Visitor: Sid Witmer

Roadmaster Barnett advised the following road listing was given to him by Supervisors as suggested at the January 22, 2008 Regular Meeting (not in prioritized order): Shinham Road, Talhelm Road, Strite Road, Maryland Line Road, Hykes Road, Filer Road, Grant Shook Road, McDowell Road, and Ridge Road.

All in attendance then proceeded to Talhelm and Strite Roads then to McDowell Road. The consensus with Talhelm Road, north of Strite Road to Marion Road, is to reclaim and pave with FB Modified material to a width of 20 feet. The consensus with Strite Road is to reclaim and pave with FB Modified material to a width of 18 feet. The consensus with McDowell Road is to reclaim between Leitersburg Road and Hollowell Church Road to a width of 20 feet; Widen the section between Wingerton Road and the Washington Township line to 20 feet; The entire McDowell Road would then be paved with FB Modified material. Prior to reclaiming, core boring samples or test digs would be performed to determine sub-base material and stone quantities needed to re-build the sub-base. Since this work would take the entire construction season to prepare, Supervisors agreed not to review any more roads.

The road inspection was completed at 9:16 A.M.

Respectfully submitted,

By: _____
